DIEGO J. MUÑOZ, PhD

Computational Astrophysicist

Center for Interdisciplinary Exploration and Research in Astrophysics, 1800 Sherman Ave, #8035
Northwestern University, Evanston, IL 60208

email: diego.munoz@northwestern.edu, website: **https://sites.northwestern.edu/diegomunoz/**

linkedin.com/in/diegojmunoz | github.com/djmunoz | scholar.google.com/citations?user=USL3xkMAAAAJ

RESEARCH INTERESTS

Planet formation, accretion disks, gas dynamics, binary black holes, planetary dynamics, numerical methods, hydrodynamics, N-body techniques, interferometry, Bayesian inference

EMPLOYMENT

Northwestern University Evanston, IL
Research Assistant Profesor — July 2021-present

Universidad Adolfo Ibañez Santiago, Chile
Assistant Profesor — July 2021-present

Northwestern University Evanston, IL
CIERA Postdoctoral Fellow / RCSA Cottrell Prize Fellow — Nov 2017 - July 2021

University of Arizona Tucson, AZ /
Technion - Israel Institute of Technology Haifa, Israel
Visiting Researcher, Steward Observatory/Physics Department — Sep 2016 - Oct 2017

Cornell University, Ithaca, NY
Research Associate, Department of Astronomy — Sep 2013 - Aug 2016

Harvard University, Cambridge, MA
Graduate Research Assistant, Astronomy Department — 2006-2013

Universidad de Chile, Santiago, Chile
Research Assistant, Astronomy Department — 2004-2006

EDUCATION

Harvard University, Cambridge, MA
PhD, Astronomy & Astrophysics. — August 2013
AM, Astronomy. — 2008

Universidad de Chile, Santiago, Chile
MSc, Astronomy. — 2006
BS, Astrophysics. — 2004

AWARDS

Cottrell Fellowship of the Research Corporation (2020-21)

CIERA Fellowship (2017-20)

Gliese Fellowship (Germany, declined) (2017)

FONDECYT National Fellow (Chile, declined) (2015)

Fulbright Scholar (2006-2010)

RESEARCH EXPERIENCE

- Discovered a mechanism of outward binary migration.
- Developed hierarchical Bayesian formalism to combine observations of stellar obliquity
- Derived analytical criteria for the modified evolution of the secular three-body problem under additional forces

• Studied the interaction of circumstellar disks with embedded planets using Lagrangian/Eulerian code AREPO
• Developed techniques for massively parallel hydrodynamics on large computer clusters
• Studied random walks in gravitational systems in the context of the Solar System
• In depth experience with finite volume methods for hyperbolic equations and symplectic methods for Hamiltonian systems
• Designed software for analysis and visualization of large sets of simulation data
• Analyzed polarimetric interferometric data at submillimeter wavelengths
• Experience in error analysis and time-series analysis of radio-wavelengths observations
• Investigated the formation of stars in massive molecular complexes
• Designed software for image processing and data mining

TEACHING EXPERIENCE

Univ. Adolfo Ibañez, Santiago, Chile
• *Waves and Thermodynamics* (Fall 2022) • *Waves and Thermodynamics* (Fall 2021)
Northwestern University, Evanston, IL
Guest lecturer in *Computational Methods of Physics* (Prof. Sasha Tchekhovskoy, Spring 2018)
Cornell University, Ithaca, NY
Guest lecturer in *Radiation Processes* (Prof. Dong Lai, Fall 2013)
Harvard University, Cambridge, MA
Teaching Fellow
• *Radio Astronomy*, (Prof. James Moran, Fall 2009) • *Radiative Processes in Astrophysics*, (Prof. Ramesh Narayan, Fall 2008) • *Cosmic Connections*, (Prof. David Charbonneau, Fall 2007)
Universidad de Chile, Santiago, Chile
Teaching Assistant
• *General Astronomy* (Profs. Diego Mardones, Fall 2005 and María Teresa Ruíz, Spring 2005) • *Introduction to Contemporary Physics* (Profs. Simón Casassus, Fall 2003 and Sebastián López, Spring 2004)

ADVISING EXPERIENCE

• Luciano Godoi (MSc student, UAI, 2022-) *Binary populations*
• Magdalena Siwek (Grad student, Harvard, 2021-) *Circumbinary disks* (co-adv. Hernquist)
• Jeremy Rath (Grad student, Northwestern, 2019-) *Disk eccentricity* (co-adv. Lithwick)
• Adam Dempsey (Grad student, Northwestern, 2018-) *Accretion disks* (co-adv. Lithwick)
• Evgeni Grishin (Grad student, Technion, 2016-17) *Dynamics of triples* (co-adv. Perets)
• Ryan Miranda (Grad student, Cornell, 2015-17) *Circumbinary disk simulations* (co-adv. Lai)
• Bin Liu (Grad student, USTC/Cornell, 2013-14) *Suppression of extreme orbital evolution in triple systems with short range forces* (co-adv. Lai)
• Michael Hammer (Undergrad, Cornell, 2013-14) *Long-term stability of circumbinary planets at high inclination* (co-adv. Lai)

SERVICE

• LOC *APS Conference for Undergraduate Women in Physics* (Evanston IL, Jan 2019)
• Referee for *The Astronomical Journal*, *Monthly Notices of the Astronomical Society*, *Astrophysical Journal Letters*, *The Astrophysical Journal*, *Astronomy & Astrophysics*, *SciPost*
• Panel member at Chandra Cycle 16 Review Panel (June 2014)
• SOC and LOC for *Emerging Researchers in Exoplanet Science II*, (Ithaca, NY, May 2016)
• External reviewer for NASA Review Panel (July 2017)
• Participant at NASA Review Panel (August 2017, August 2018)

GRANTS

• **2023-25 "Planets in Long-Lived Accretion Disks"** (22-XRP22_2-0001) **Co-I (PI Lithwick), $410K**
• **2022-23 "Electromagnetic Signatures of Massive Black Hole Binaries"** (Seed Funds Grant, UAI Chile) **PI, $15K**

• **2022-25 "Formation and Dynamics of Planets in Distorted Disks"** (Fondecyt Regular 1220361, Chile) **PI, $140K**
• 2021-25 "Stellar Dynamics and Stellar Collisions in Star-by-Star Models of Nuclear Star Clusters" (21-ATP21-0144) Collab (PI Rodriguez)
• 2020-24 "Relativistic Simulations of Accreting Neutron Stars" (80NSSC21K1746) Collab (PI Parfrey)
• **2017-21 "Orbital Evolution in Multi-star Systems"** (17-ATP17-0070) **Co-I (PI Kratter), $495K**
• 2015-19 "Origin of exoplanets within and around binary stars" (15-XRP15_2-0010) Collab (PI Rafikov)

Technical Skills

Programming
Python (fluent), C (fluent), C++ (intermediate), Unix bash script (fluent), SQLite (basic)
Statistical Modeling
Hierarchical Bayesian inference, Time Series, Spectral (Fourier/wavelet) Analysis, MCMC Parameter Estimation, PCA, Feature Engineering, Decision Trees, Clustering
Numerical Techniques
Partial and ordinary differential equations, Monte Carlo, visualization/ray tracing
Tools
Unix/Linux, Latex, OpenMPI, Git, NumPy, SciPy, scikit-learn, Pandas

---

Organizations/ Outreach

• Co-organizer, mentor and lecturer at the *Research Experiences in Astronomy at CIERA for High School Students* program (REACH) at Northwestern University (2021-)
• Regular presenter at *Ask an Astronomer* events at the Adler Planetarium (2019-)
• Creator and admin of spanish-language science blog http://laformadelatierra.com
• Science in the News Boston: board member, AV coordination and llecturer, Lecture: "The Box in a (Pretty Big) Box: From Cells to Galaxies Using Supercomputers" Oct 24th, 2012 (lecture video https://vimeo.com/57476524)
• Contributed article: "Astronomy: The Gateway Science" (*Policylab*) http://www.policylab.org/2013/05/18/astronomy-the-gateway-science/
• Contributed art: http://www.policylab.org/2013/06/12/312/ (*Policylab*)

Colloquia, Invited Talks and Conference Presentations

• **HUJI astrophysics seminar**- Jerusalem, Israel (remote, December 2022)
• NANOGrav Fall Meeting- Contributed Talk: *A Revised Paradigm of Binary-Disk Interaction*, Milwaukee, WI (October 2022)
• MPIA Planet Formation Group Meeting - Heidelberg Germany (remote, May 2022)
• **CIERA Astrophysics Seminar** - Evanston, IL (April 2022)
• KITP Program BINARY22- Key participant (March-April 2022)
• Distorted Astrophysical Discs - Contributed Talk: *Long-Lived Eccentric Modes in Circumbinary Disks*, Cambridge, UK (May 2021)
• TrEnDy3 - Contributed Talk: *Eccentric Black Hole Mergers from Evection Resonances in AGN Disks*, Evanston, IL (March 2021)
• Exploring supermassive black holes - **Invited Talk**: *Hydrodynamic Simulations of Circumbinary Disks*, Princeton, NY (October 2020)
• Growing Black Holes: Accretion and Mergers - **Invited Review Talk**: *Migration of Supermassive Black Hole Binaries*, Kathmandu , Nepal (April 2020, suspended due to COVID)
• Great Barriers in Planet Formation - Contributed Talk: *Circumbinary accretion: challenges for the formation of close binaries and circumbinary planets*, Palm Cove, Australia (July 2019)
• Astrophysical Dynamics - **Invited Talk**: *Hydrodynamics of Circumbinary Accretion*, Shanghai, China (July 2019)
• **Astronomy Colloquium** - Lowell Observatory , Flagstaff, AZ (October 2018)

• Triple Evolution and Dynamics 2 - Contributed Talk: *Circumbinary disks and the formation of coplanar triples*, Leiden, Netherlands (September 2018)
• **Astrophysics Seminar** - University of Chicago, Chicago, IL (June 2018)
• **Astronomy Colloquium** - University of Wisconsin - Madison , Madison, WI (January 2018)
• Exoplanets and Planet Formation 2017 - **Invited Talk**: *Accreting Circumbinary Disks: a Link Between Star and Planet Formation*, Shanghai, China (December 2017)
• Chicago-area exoplanet meeting '17 - Contributed Talk: *Planetary Engulfment as a Trigger for White Dwarf Pollution*, Chicago, IL (December 2017)
• **Astrophysics Colloquium** - CCA Flatiron Institute, New York, NY (November 2017)
• Numerical Simulations of Planet-Disc Interactions - Contributed Talk: *Orbital Migration with Steady Accretion: Binaries and Massive Planets*, Cuernavaca, Mexico (November 2017)
• Origins Seminar - University of Arizona, Tucson, AZ (September 2017)
• Planets beyond the main sequence - Contributed Talk: *Planetary Engulfment as a Trigger for White Dwarf Pollution* , Haifa, Israel (March 2017)
• ERES II - Contributed Talk: *The formation efficiency of close-in planets via Lidov-Kozai migration*, Ithaca, NY (June 2016)
• Extreme Solar Systems III - Contributed Talk: *Survival of Planet Around Shrinking Binaries*, Kona, HI (December 2015)
• **Theory Colloquium** - University of Arizona , Tucson, AZ (November 2015)
• Theory Seminar - CITA , Toronto, ON (October 2015)
• Group discussion leader: Circumbinary planets - SPF-1 , Tucson, AZ (March 2015)
• **Astronomy Colloquium** - Cornell University , Ithaca, NY (October 2014)
• Astrophysics Lunch - Cornell University , Ithaca, NY (September 2013)
• Theory Lunch Talk - University of Maryland , College Park, MD (November 2012)
• TUNA Lunch Talk - NRAO, Charlottesville, VA (November 2012)
• Star and Planet Formation Seminar - STScI , Baltimore, MD (November 2012)
• Astronomy Group Meeting - Carnegie DTM , Washington, DC (November 2012)
• Exoplanet Seminar - NASA Goddard Space Flight Center, Greenbelt, MD (November 2012)
• Seminar - DARK Cosmology Centre, Copenhagen, Denmark (August 2012)

Publications (total citations: 2082 / 1st+2nd author citations: 1028/ h-index: 19)
