Analysis Files:

Dmap_tint_ss2.R→ Basic analysis file includes code for table 1 and table 2 (descriptive statistics) and table 3 (meta-regressions) and all figures (figure 1 to 4). Reads in from the Stata data file "dmap_rv7_v4_verysmall.dta". Table output goes to "ss2_tab.csv" and "ss2.csv" (copies included).

"dmap_rv7_v4_verysmall.dta"→ basic data in Stata (because we initially entered and checked the data in Stata, then read it into R for analysis)

"ethnic_penalties_by_group_2.dta"→ Stata data on ethnic penalties (from Heath and Cheung 2007) and used to make figure 4
