Page Section Instructions

NUsites templates are made with Divi Builder full-width modules (sections) that have the exact Global Marketing branding that our main University website uses. Divi Builder is a drag-and-drop website builder that helps users with limited WordPress knowledge create a website.

Northwestern Branded Sections/Modules

We currently have 13 sections/modules that NUsites users have the ability to use on their website

To see an example of how each of these modules work please visit the following page: http://sites.northwestern.edu/divi-modules/.

Here are all the options available:

Insert Module ✕

New Module

☰ Accordion	☰ Alternate Float	☰ Curated Posts
☰ Events Feed (PlanItPurple)	☰ Feature Box	☰ Hero Banner
☰ Photo Feature	☰ Photo Grid	☰ Recent Posts
☰ Statistics Callout	☰ Tabs	☰ Text
☰ TimelineJS
