- What's interesting to you about the future of law and technology?

Computational Technologies  
are changing everything.

Change has been accelerating.  
COVID-19 caused years of change in weeks.

The Digital World needs Digital Governance

What will legal services, legal systems, and  
the law look like in a digital world?

# Law for Technology

Trustworthy AI

FAT AI: fair, accountable, transparent

# Technology for Law

Technology for Legal-Services Delivery,  
Legal Systems, and Law

## The Four Universal Principles

The World Justice Project's definition of the rule of law is comprised of the following four universal principles:

### 1. Accountability

The government as well as private actors are accountable under the law.

### 2. Just Laws

The laws are clear, publicized, stable, and just; are applied evenly; and protect fundamental rights, including the security of persons and property and certain core human rights.

### 3. Open Government

The processes by which the laws are enacted, administered, and enforced are accessible, fair, and efficient.

### 4. Accessible & Impartial Dispute Resolution

Justice is delivered timely by competent, ethical, and independent representatives and neutrals who are accessible, have adequate resources, and reflect the makeup of the communities they serve.

 @DanLinna

# DISCRIMINATION IN THE AGE OF ALGORITHMS

---

*Jon Kleinberg\**, *Jens Ludwig\*\**, *Sendhil Mullainathan†* and  
*Cass R. Sunstein‡*

## ABSTRACT

The law forbids discrimination. But the ambiguity of human decision-making often makes it hard for the legal system to know whether anyone has discriminated. To understand how algorithms affect discrimination, we must understand how they affect the *detection* of discrimination. With the appropriate requirements in place, algorithms create the potential for new forms of transparency and hence opportunities to detect discrimination that are otherwise unavailable. The specificity of algorithms also makes transparent tradeoffs among competing values. This implies algorithms are not only a threat to be regulated; with the right safeguards, they can be a potential positive force for equity.

Homeland  
Security

June 15, 2012

MEMORANDUM FOR: David V. Aguilar  
Acting Commissioner, U.S. Customs and Border Protection

Alejandro Mayorkas  
Director, U.S. Citizenship and Immigration Services

John Morton  
Director, U.S. Immigration and Customs Enforcement

FROM: Janet Napolitano  
Secretary of Homeland Security 

SUBJECT: Exercising Prosecutorial Discretion with Respect to Individuals  
Who Came to the United States as Children

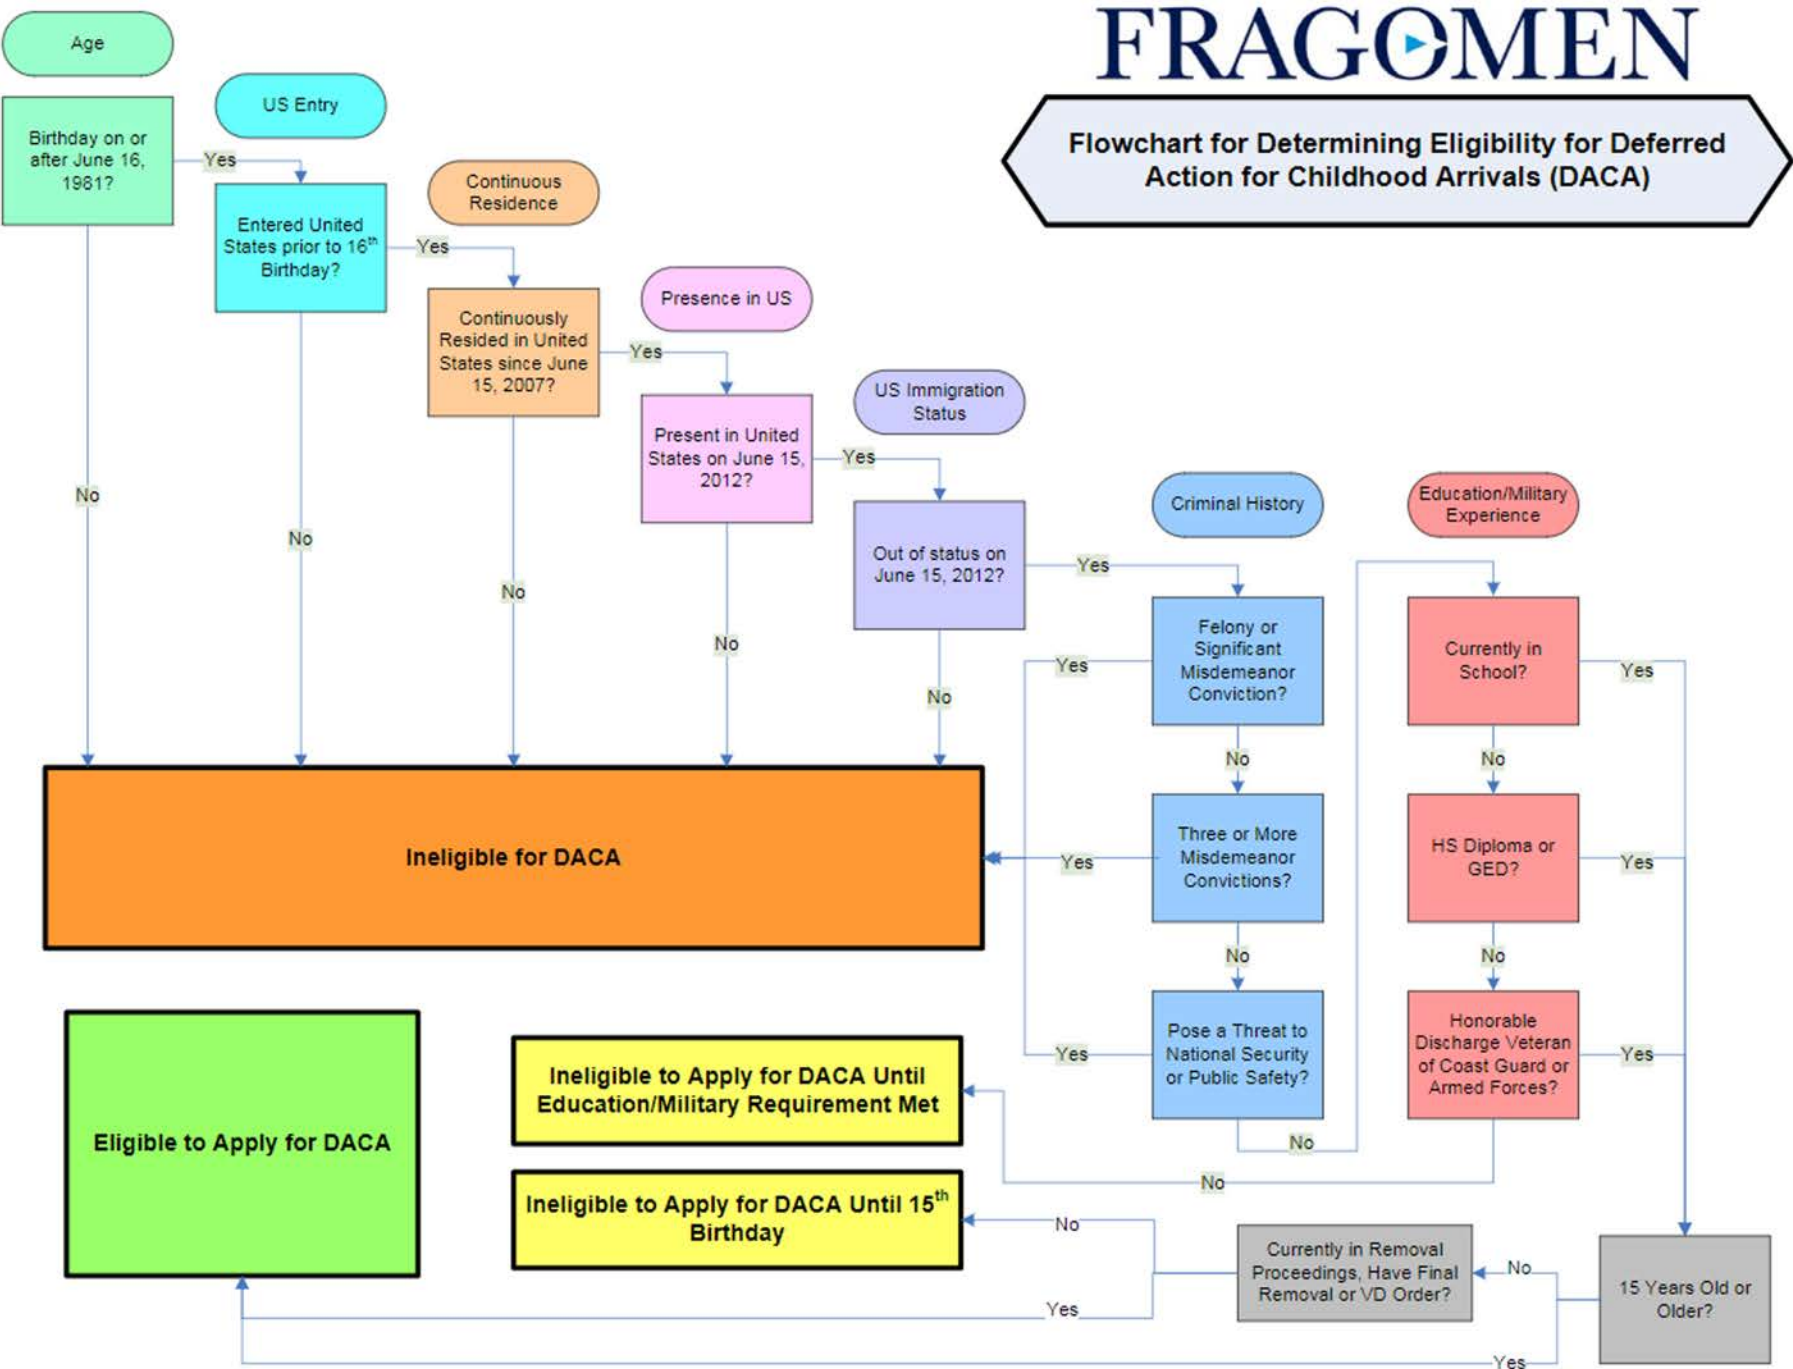

By this memorandum, I am setting forth how, in the exercise of our prosecutorial discretion, the Department of Homeland Security (DHS) should enforce the Nation's immigration laws against certain young people who were brought to this country as children and know only this country as home. As a general matter, these individuals lacked the intent to violate the law and our ongoing review of pending removal cases is already offering administrative closure to many of them. However, additional measures are necessary to ensure that our enforcement resources are not expended on these low priority cases but are instead appropriately focused on people who meet our enforcement priorities.

The following criteria should be satisfied before an individual is considered for an exercise of prosecutorial discretion pursuant to this memorandum:

- came to the United States under the age of sixteen;
- has continuously resided in the United States for a least five years preceding the date of this memorandum and is present in the United States on the date of this memorandum;
- is currently in school, has graduated from high school, has obtained a general education development certificate, or is an honorably discharged veteran of the Coast Guard or Armed Forces of the United States;
- has not been convicted of a felony offense, a significant misdemeanor offense, multiple misdemeanor offenses, or otherwise poses a threat to national security or public safety; and
- is not above the age of thirty.

# FRAGOMEN

## Flowchart for Determining Eligibility for Deferred Action for Childhood Arrivals (DACA)

## I Need a Divorce and I Have Children

This toolkit tells you about getting a divorce when you and your spouse have minor children. For general information about divorce, read the **Articles**. Read the **Common Questions** if you have a specific question. If you want to file for divorce, use the **Forms** links for help preparing the forms you will need. Use one of the **Checklists** below to follow all the steps in the process. The links under **Court Information** will tell you about the court that will handle your case, and if there is a **Self-Help Center** in your county you can get more help there.

*If you don't think you can handle this problem on your own, you can search for an attorney using **Find A Lawyer** on this page. If you need something else related to your problem, an agency listed under **Community Services** may be able to help you. If you need a fee waiver, an interpreter, a court to accommodate your disability, or more information about going to court, visit the [Going to Court: Extra Tips and Forms Toolkit](#).*

### Common Questions

- How long do I have to live in Michigan before I can file for divorce?
- Where do I file for divorce?
- What if my spouse doesn't live in Michigan?

### Forms

- Do-It-Yourself Divorce
- Do-It-Yourself Judgment of Divorce
- Do-It-Yourself Quitclaim Deed (after Divorce)
- Do-It-Yourself Revoke Paternity Established by Marriage
- Do-It-Yourself Divorce Dismissal

### Articles

## Manifesto for Agile Software Development

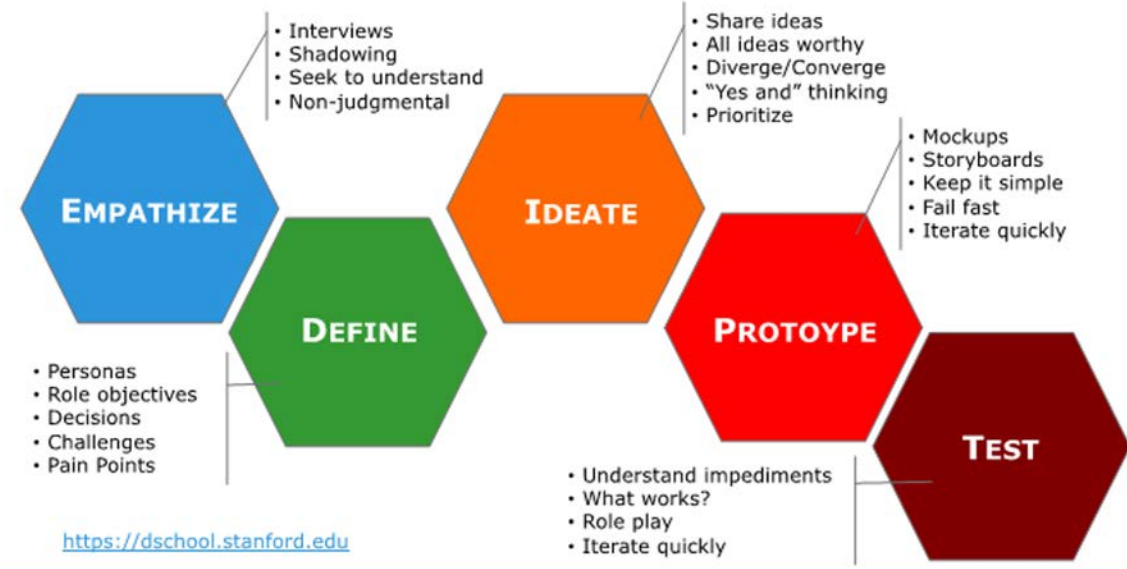

We are uncovering better ways of developing software by doing it and helping others do it. Through this work we have come to value:

- Individuals and interactions over processes and tools
- Working software over comprehensive documentation
- Customer collaboration over contract negotiation
- Responding to change over following a plan

That is, while there is value in the items on the right, we value the items on the left more.
