

If your computer does not have java installed, please open the link below:

<http://www.oracle.com/technetwork/java/javase/downloads/jre8-downloads-2133155.html>

Choose the current version of Java Runtime Environment (at the time of this writing **Java SE Runtime Environment 8u201**) suitable for your operating system and download it (after accepting the License Agreement). For example, if you have a popular Windows x64 system, download **jre-8u201-windows-x64.exe**. For Mac users, download **jre-8u201-macosx-64.dmg** (although we did not test on Mac extensively). The process takes less than 5 minutes depending on your connection speed.
