

EPS 351 Presentations

Overview: Your task is to explain your key arguments, why this is important, and how the mission will address it.

Oral: The oral version will be a 5-minute presentation, designed to "sell" the key point. It's the scientific equivalent of a venture capital "elevator pitch."

For good advice, read the attached article.

Your PowerPoint presentation should be in **Ignite** format where presenters get 20 slides, which automatically advance every 15 seconds. For advice on Ignite:

<http://sixminutes.dlugan.com/ignite-presentations/>

or similar websites.

There's a sample Ignite talk at

<https://www.youtube.com/watch?v=AYiWtkeDtdo>

To make such a PowerPoint, set up your 20 slides (some can repeat) and then use the "Transitions" tab: unclick "Advance slide on mouse click" , click "After" at set the time to 15 seconds for all slides

Getting this to work takes practice, so budget the time!

Please email your presentation to us before your presentation by noon so we can load them.

Written:

The written version should be 5-10 pages, double spaced, including figures and references, in AGU journal format. For a sample, see

<http://www.earth.northwestern.edu/people/seth/Texts/mcrevoln.pdf>

See flip-side for further details on Team Report.
